How to use AT command for SDX55 chipset on Windows (EM91 Series/EM7690)?
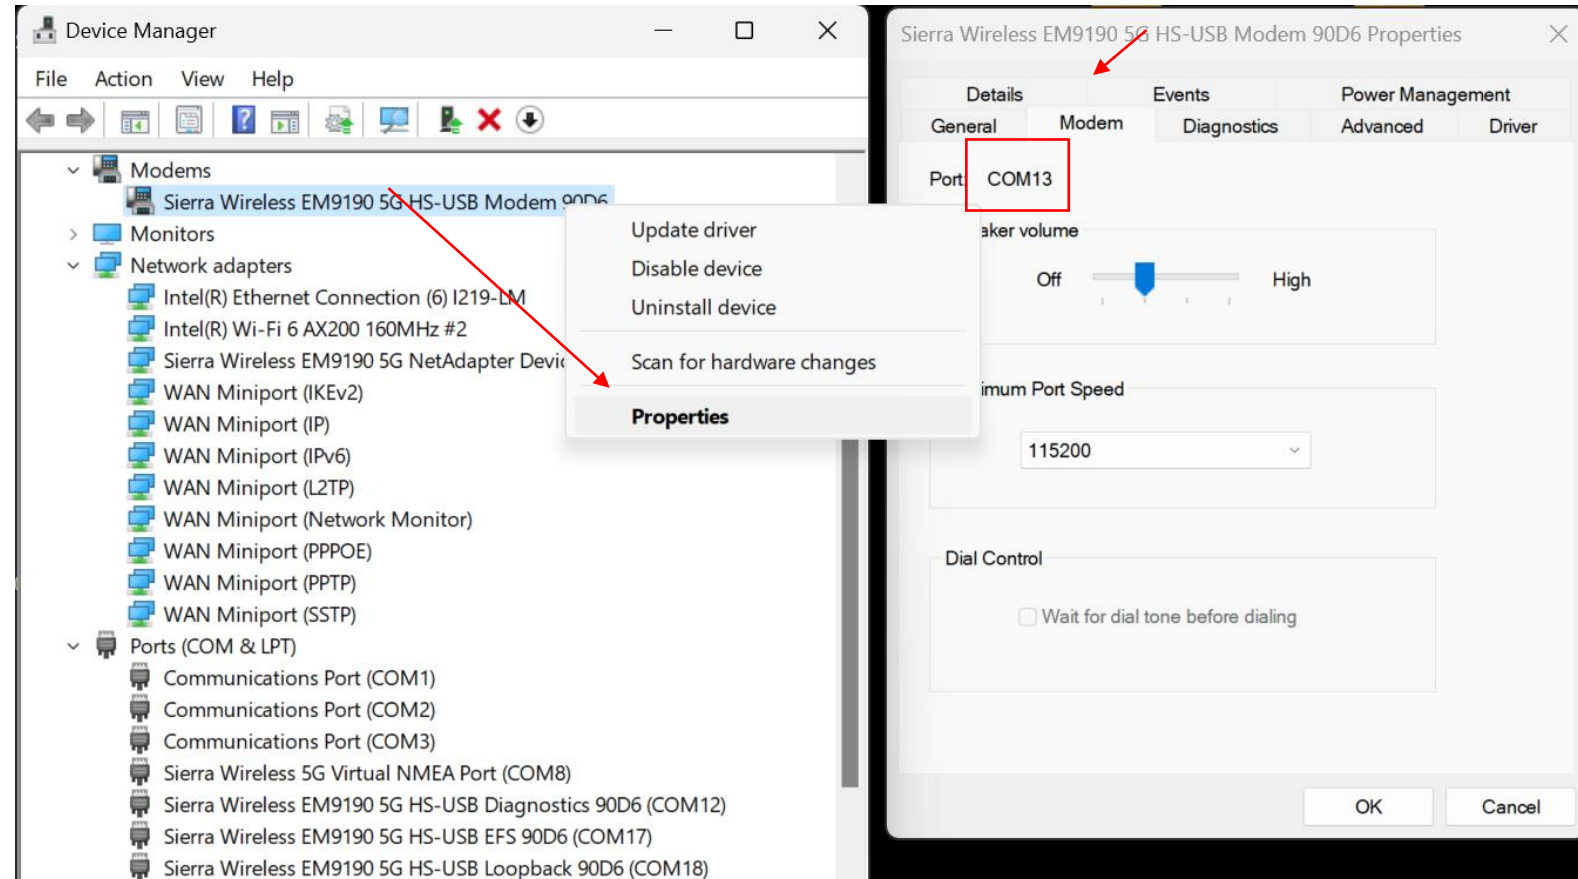

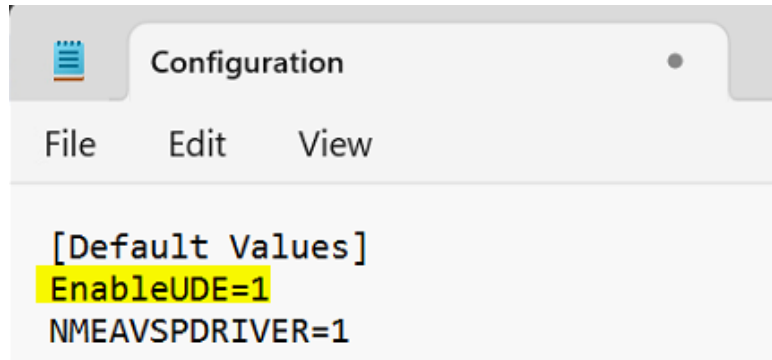

- For MBPW Release 31 or newer, please add "EnableUDE=1" in configuration.ini, then install the driver.

- Open Device Manager and find Modem Port

- Right click -> properties -> Modem -> Port: COMx

- The example is COM13

- Open Modem port via Terminal tools, such as Tera Term, Putty, etc.

- Demo with Tera Term. For COM13

- Please refer to AT Command Guide. →
