

Sierra modules Linux drivers

- EM74 Series, EM75 Series, EM91 Series, and EM7690.

Download the MBPL_DRIVERS_R32_ENG2-usb-src.tar from the following link: [Mobile Broadband Package for Linux \(SDK, Drivers, Documentation\)](#)

Please refer to Linux user guide to install the driver

Software_Integration_and_Development_Guide_for_Linux_USB_Platforms_R24.pdf

- EM7590

EM7590 modules uses the following Linux open source drivers:

- QMI_WWAN driver — Used by RmNet data and control driver
Patch required — [EM7590 qmi_wwan patch](#)
- QCSerial driver — Qualcomm USB serial port used by the Modem AT command port, diagnostic DM serial port, and NMEA GPS port
Patch required — [EM7590 qcserial patch](#)
- MBIM driver — Default build-in CDC_MBIM (Patch not required)

EM7590 modules also use the following libraries for the user space control application:

- libqmi — <https://www.freedesktop.org/wiki/Software/libqmi/>
- libmbim — <https://www.freedesktop.org/wiki/Software/libmbim/>

The following EM7590-specific documentation for libQMI is available:

- [EM7590 QMI Interface Specification](#)
- [EM7590 libQMI User Guide](#)
